who are we?

Who Are We?

Epica Solutions is an Australian owned Consulting and Data Management organisation specialising in Supply Chain Management. Epica Solutions is built on the expertise that it's personnel bring to the company, namely - skills and experience in Supply Management, Cataloguing, Materials Management Systems analysis and development.

Our Origins

Epica Solutions is borne out of a vision of providing cost effective supply concepts and processes. Core concepts that are readily transparent, intuitive, and functional - designed to provide efficiency whilst maintaining best practice standards.

Although the supply chain is one of the last bastions for deriving significant cost benefits, within many organisations, it is either ignored or given scant recognition. Supply is viewed as a drain on the organisation rather than being a profit contributor. We in supply may be to blame, as many of our practices and procedures are couched in intricacy, hype and jargon.

Whatever happened to the basic axiom of "getting the right item, to the right place, at the right time, and right price"?

Why not put in practices, processes and systems that achieve this axiom without the hype and use that as a basic building block to turn supply into a profit contributor

What We Do

The provision of data content services through tailored solutions enabling client organisations to realise true productivity gains from their investment in supply systems.

Epica Solutions is about achieving excellent outcomes through the implementation of achievable practical supply management processes. The mission will be achieved initially through the following product range.
